In-reach

```
Requested data          Data Analysis          Summary statistics
deposited on in-                                created
reach
```

Summary statistics created → Request for summary statistics to be removed from in-reach → Summary statistics checked by Data Management Team → Summary statistics extracted from in-reach by Data Management Team → Summary statistics added to publication or thesis

Legend:
- Data Management Team actions
- Data Requester actions

Please note:
- Summary statistics include summary tables and charts. No individual level data will be approved for removal from in-reach.
- Written documents should not be created on in-reach. Personal drives or One drive could be used for this instead. Creating written documents on in-reach will cause considerable delay when requesting the removal of files from in-reach.
